

SJM School of Management, IIT Bombay

Specialization for 2-year MBA Programme

Our 2-year full time MBA program requires students to earn 139 credits. As per the current credit structure MBA students earn 80 credits during first year and 59 credits (including 2 credits for summer internship) during second year. During first year only core courses are offered and during second year only elective courses are offered.

In view increasing demand for professionals with specialized knowledge and training, school faculty decided to offer the option of specialization to the MBA students which leads to degree of 'Master of Business Administration with Specialization in',.

To get MBA degree with specialization interested student is required to earn at least 30 credits from the elective courses in the functional area (Finance/Operations Mgt/Marketing/Information System..) of her/his choice. Student will be choosing only one area for specialization.

To start with Finance and Operations Management areas are offering sufficient elective courses to specialise. Going forward other functional areas also will be offering sufficient courses to specialize.
